

Job Title: Shop Class Instructor (Agriculture)
Employment Classification: Non-Exempt—Regular, Full Time 10/mos year

Description

Rancho Cielo is looking for a qualified and experienced individual to pass along their skills and knowledge to the future workforce in the industrial mechanics industry. By joining us you'll have the opportunity to teach and train tomorrow's technicians.

Experience in most of the following areas is required: electricity, electric motor circuits, control circuits, PLC's, hydraulics, pneumatics, mechanical drives systems, safety and print reading. At least one year experience in an academic setting or teaching environment is preferred but not required. Must be an organized, self-motivated individual who works well in a team setting. This position requires a positive attitude along with good communication and presentation skills. In addition, you must be capable of teaching students with diverse academic abilities.

Responsibilities:

- Establish working relationships with local industry leaders to coordinate trainings, seminars, and onsite visits.
- Discuss/ emphasize food safety requirements and industry expectations. Identify sanitary design and the importance of applying these concepts into the engineering.
- Teach classes on a regularly scheduled basis: Plans, develops, and uses effective teaching methods and materials which assist students in meeting course objectives, are appropriate for students with diverse educational and experiential backgrounds and learning styles, and engage the students in learning
- Establish and maintain academic and attendance records for student files
- Maintain a neat and orderly classroom or lab
- Submit attendance, grades, student evaluation, and all other required reports/documentation to the program coordinator/director per established procedures
- Oversee maintenance for all equipment used by students
- Stay up to date with relevant industry standards and attend trainings as needed
- Adapt curriculum to the level of the students
- Focus on the safety requirements and job readiness skills necessary to be successful in the field.

Qualifications, Education and Experience:

- **MUST** have High School Diploma, GED, or Associates degree in related field preferred

- **MUST** have a minimum of three years related practical work experience
- **MUST** be able and willing to work/teach day classes- Monday through Friday
- **MUST have experience teaching or working with students who are underserved**
- Knowledge of servicing, troubleshooting, and installation of maintenance equipment; General Machine shop work preferred
- OSHA standard 10 training certification required
- Proficient using technology and Microsoft Office software
- Previous classroom/laboratory instructor experience preferred

If you meet the four **MUST requirements**, please submit your resume and cover letter through Indeed.
